

To the FCC in the matters of RM-11834 and RM-11835

My name is Matthew Pitts. My Amateur Radio call is N8OHU. I am the Vice President of the BSoD Amateur Radio club which holds the Vanity Call WB5OD. We are a club with members in numerous US States and Call Areas, as well as some International members. It is my considered opinion that it is unfair to groups such as ours, that have such a dispersed membership, that the option of having a descriptive call that harkens back to an earlier age of the Internet, or any call of their choosing, should be denied to them because someone feels that those in a call area should have priority. Thus, it is my request on behalf of the club membership that you deny both of the mentioned proposals.
